## Executive Summary

ICUF institutions are diverse, with different missions. They serve a variety of student populations and offer a wide selection of undergraduate, graduate, first-professional programs and continuing education studies. The institutions are dispersed throughout the state with their main campuses generally located in or near large cities, such as Miami, Fort Lauderdale, Orlando, St. Petersburg, Jacksonville, and Tampa. Some of Florida's lesser known cities—Lake Wales, Deland, Babson Park – are also home to many ICUF universities and colleges.

Total enrollments at ICUF institutions ranges from approximately 90 to more than 22,000 students. The ICUF members include institutions that offer majors in liberal arts and sciences, including nursing and education, fine arts, engineering, information technology, computer science and other high-skill technical fields. When satellite education sites and distance learning became a viable means of higher-education, many of Florida's independent colleges and universities immediately realized the possibilities and potential growth it could bring them. They began aggressively to develop new educational sites, campuses and techniques around the state, the nation and the globe.

- One or more of 10 ICUF institutions are located on 18 community college campuses, providing degree completion options.
- Many satellite locations provide degree completion courses in under-served urban and rural communities.
- ICUF institutions are training teachers and offering alternative teacher certification courses around Florida and in schools.
- Employers can enlist ICUF to offer degree completion and continuing education courses for employees at their businesses.
- ICUF institutions operate learning centers on the State's military bases and training facilities.
- ICUF institutions provide credit courses on-line that lead to bachelor and graduate degrees.

The Independent Colleges and Universities of Florida have 174 educational sites throughout Florida. Eight colleges offer on-line courses and degrees that can be accessed from any computer anywhere in Florida. ICUF institutions and satellite sites are located in all of Florida's larger cities and in rural locations throughout the state. More than 22,000 students attend ICUF classes at these satellite sites including 18 community college campuses.

## Independent Higher Education Industry

During the 2002 Session, the Florida Legislature continued the task of laying the groundwork for the transformation of the state's educational system as mandated by changes to the Florida Constitution.

Those who work in and around education in Florida are finding that the most fundamental change – creating a seamless K-20 system – may also be the most difficult to accomplish. ICUF member institutions (moved to the Division of Colleges and Universities during the reorganization) are striving to play an integral part in that task. Our institutions, while independent of state governance, consider themselves a vital part of Florida's educational structure. To that end, we have compiled an updated comprehensive list of off-site/satellite locations. The following sources were used:

- State of Florida Concurrent-Use Task Force survey (November 2000 – March 2001 (Division of Community Colleges)
- Off-site survey conducted by ICUF (November, 2002)
- Main campus and satellite site survey conducted by ICUF (October – November 2002)
- Institutional websites

To date, the institutions from which we collected offsite/satellite enrollment figures reported a total enrollment of over 22,294 students. The list is still evolving and although every attempt was made to reconcile all of the information, it is likely that discrepancies exist.

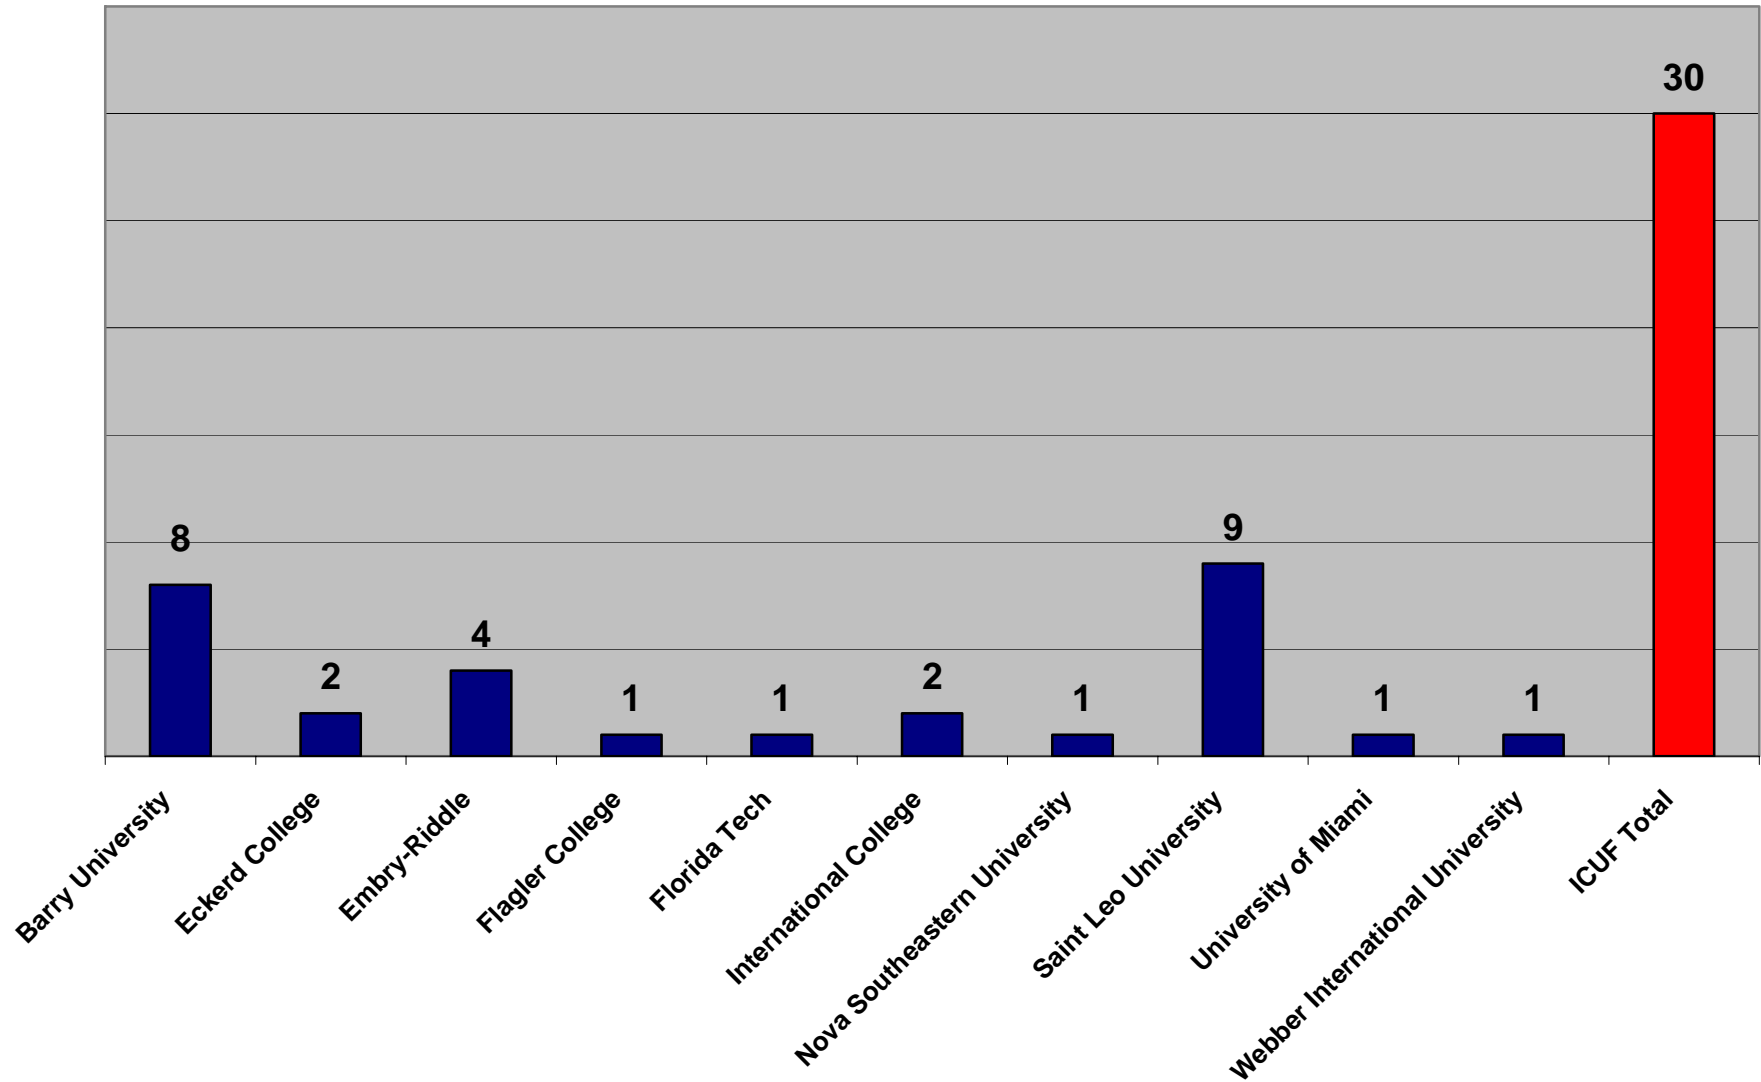

In regard to online learning programs, our institutions are offering more online classes than this report indicates. This report focuses primarily on only the on-line degree programs offered and not individual on-line courses, classes and labs.

As we continue to add information to this report, we at ICUF are proud to share how successful and committed our member institutions are to delivering quality education to residents throughout Florida.

## **ICUF's 28 Member Institutions At-a-Glance**

- ICUF has identified at least 174 institutional programs in Florida alone. Additionally, ICUF institutions serve the nation and the world via the Internet, branch campuses, military bases and special educational programs.
- ICUF's offsite institutional programs enroll over 22,294 students.
- 21 of the 28 ICUF institutions train teachers and have more than 5,000 education majors heading to classrooms.
- 11 ICUF schools offer nursing programs.
- Through offsite/satellite programs, ICUF institutions have a presence on 18 of the 28 Community College campuses.
- Like Florida's public universities and community colleges, ICUF institutions are SACS accredited, degree granting, non-profit and domiciled in Florida.
- Including those seeking advanced degrees, more than 120,000 students enrolled in ICUF institutions in 2003.
- Together, ICUF's member institutions have an \$8.4 billion economic impact in Florida; directly employ 13,000 of the state's residents; indirectly create 140,000 jobs; and, have a total of \$3.4 billion in assets. They are in the midst of a 5 year, \$1.8 billion capital/construction project.
- 43% of the total of ICUF undergraduate students who are Florida residents are minorities.
