

Panhandle Area Education Consortium in Partnership with The University of Tampa Hosts

Science-Math-Master (SM²) provides professional development to teachers, upgrading their skills in Biology and Geometry and boosting the performance of high school students who must master biology and geometry to succeed in school and beyond. In partnership with the Florida Department of Education, The University of Tampa is developing and delivering classroom sessions and an on-line system for teachers statewide.

Sessions will focus on:

- Expanding teachers' biology and geometry content and instructional skills;
- Demonstrating effective tactics and techniques that address the new Next- Generation Sunshine State Standards for biology and geometry; and
- Implementing on-line tools that teachers and students can use statewide.

April 28, 2012

Panhandle Area Education Consortium
